

Ride-A-Long Registry

An Opportunity to Briefly Experience and Better Understand Commercial Fishing

Purpose:

The purpose of the registry is to provide opportunities for scientists, managers, students and elected officials to experience commercial fishing from a commercial fishermen's perspective. The goal is to broaden the understanding of commercial fishing, develop themes or concepts for future research, provide first hand experience on fishing operations and limitations, bring reality to conceptual management and academic studies.

How It Works:

This registry is self propelled. Interested guests make their own contacts and arrangements with the contact person on the list. All of the volunteers listed in the registry are commercial fishermen. Most of them are trawlers. Some use other gears as well; some of them hook and line, long line, trap, seine, etc. Fisheries vary; most groundfish but some may also shrimp (April to October), some may also crab (December to March or beyond). Some may troll for salmon and tuna (June through September). Most of these boats usually fish close to their home ports. NOTE, these ARE NOT "DAY" BOATS -- they fish multiple days and stay at sea until done.

Registry Participants:

<u>First</u>	<u>Last</u>	<u>Vessel Name</u>	<u>City</u>	<u>State</u>	<u>Zip</u>	<u>Phone</u>
